**New Software Release**

Jands have released software version 5.0.1.3 for the Event408 and Event416 control consoles. This software is available for download from the downloads section of the Jands web site:

[http://www.jands.com.au/download.nsf/htcurrentlist/\\$first?open&Type=Software](http://www.jands.com.au/download.nsf/htcurrentlist/$first?open&Type=Software)

This software may be retrofitted to all Event408 and Event416 consoles.

This is a maintenance release containing a number of fixes to the main operating software. Refer to the web site for details of the bug fixes.
