**New Software Release**

Jands/Flying Pig systems have released Hog software version 3.2(169) for the Hog500 and Hog1000 control consoles. This software is available for download from the Wholehog II downloads section of the Flying Pig web site:

<http://www.flyingpig.com/support/hog2/downloads/>

This software may be retrofitted to all Hog500 and Hog1000 consoles, plus all Echelon1K consoles fitted with V3 software.

This is a maintenance release containing a number of fixes to the main software and numerous additions to the ROM Library. In addition, the maximum channel count for Hog500 consoles has been raised from 512 to 1024 channels.
