EVENT V3.1A SOFTWARE RELEASE

As of 4/9/96, Jands has released Event Standard and Event Plus V3.1A software. This supersedes all previous releases and supports the following features and functions:

- Improved factory test interface routines.

These routines have no effect on user operation and require no change to the user manual.

Consoles manufactured with serial number I96000 and above include this software as standard.

This software is retrofittable to all Event Plus consoles, and Event Standard consoles manufactured with V1.5 printed circuit boards.
